Categoria: B

Python developer

Despre mine

I make web apps with Python, using tools like Django, FastAPI and Flask to make sure they're solid and work well. I'm good with databases and can make it easy to manage data. I can also gather data from the web quickly and believe in keeping my code neat and easy to handle. Plus, I make sure my code is error-free and well-organized.

I also know web stuff like HTML and JavaScript, and I'm ready to work together on cool projects.

PYTHON

Flask / FastApi / SQLAlchemy / BeautifulSoup / Requests / Selenium / PIL / PyTest / MyPy

OTHER

AWS / Linux / HTML / CSS / JS / React / VUE /SQL / PostgreSQL / PHP
