# Android Developer

## About me

I started my career in 2003 at the "Topaz" factory as a Senior Technician in the Electronics Development Department. Here, I learned to work with documentation, which was very useful in the future. Then, I worked as a Telecommunications Engineer and System Administrator at Zikkurat Holding. While doing my job, I began to automate my routine tasks using JavaScript and PHP, and I realized that my true passion was programming.

In 2009, I started my career as a Fullstack PHP Developer. I studied a lot, both on my own and through courses, and eventually became a Tech Lead in the Legacy Projects Support Department. I also successfully introduced SCRUM as part of the management team.

In 2014, I decided to switch to Android application development. Within a month, I learned Android programming to a Junior level and have continued to grow in this field.

## Work experience
